## ***Introduction***

For each area of interest of public life and administration activities, a short list of issues or possible topics for discussion is given, taken from the Program received: every Workgroup can obviously refer to, add or modify this list.

The issues should also be considered as titles for :

- a) actions planned or accomplished by the various Town Councils
- b) areas susceptible of possible future interest or development, that the Town Councils can approach or detail better.

We think that putting together ideas, examples, accomplishments, comparisons, feasibility evaluations concerning these issues, with respect to what Administrations can do or cannot do, can reveal to be generally useful, and specifically useful for our behavior as citizens and as citizens of Europe.

The outcome could then be a direction of actions to be shared by all the Europeans, and can be a way to help ourselves and other people to have a better living.
